AIRVO™ | Fisher & Paykel

When creating Nasal High Flow, the Fisher and Paykel Research and Development team, merged their proven expertise of Optimal Humidification delivery with an ability to accurately deliver up to 100% oxygen. What allows us to deliver these higher concentrations of oxygen is the unique blueprint of our Optiflow interfaces.

[Fisher & Paykel Optiflow Nasal High Flow Cannula](#)

High-flow nasal oxygen therapy (HFNOT) is increasingly used as part of both ward-based and critical care management of respiratory failure. Respiratory failure is distressing for patients and treatment modalities currently in use may be associated with discomfort from upper airway drying, tightly fitting facemasks, and resultant complications such as skin breakdown.
