Sap xmii pdf - WordPress.com

The SAP xMII is also capable of processing XML input via the XML connector, and feeding this data to other SAP xMII components such as the Java applets or the agent subsystem. The SAP xMII utilizes XML internally to store system query and display templates, and other server-side persistent data.

Guide For Sap Xmii For
SAP MII (SAP Manufacturing Integration and Intelligence) is an SAP application for synchronizing manufacturing operations with both back-office business processes and standardized data. It functions as a data hub between SAP ERP and operational applications. It also provides analytics and workflow tools for identifying problems in the production process and improving its performance.
