## Learn the Basics of Hazardous Waste | US EPA

Hazardous Waste At Derwent, our experienced team specialises in the collection, handling and disposal of hazardous waste. We understand that hazardous waste needs to be contained and disposed of safely, and the environment protected at the same time.

Hazardous Waste Management

Hazardous waste management Industries produce hazardous waste which due to one of its characteristics (defined in the Environment code), presents a risk for people and the environment. Hazardous industrial waste comes in many different types: solid and liquid, packaged or in bulk (skips, tanks). They must all be handled by specialised channels.

The hazardous waste management plan outlines all of the waste management elements of a project, which includes: The procedures used to collect and dispose of hazardous waste The measures which will be taken to minimise waste generation associated with that specific project  
[Waste Management near Barbican | Reviews - Yell](#)

Several options are available for hazardous-waste management. The most desirable is to reduce the quantity of waste at its source or to recycle the materials for some other productive use. Nevertheless, while reduction and recycling are desirable options, they are not regarded as the final remedy to the problem of hazardous-waste disposal. There will always be a need for treatment and for storage or disposal of some amount of hazardous waste.
