"This is a book I (David) secretly wanted to write. I have long believed that what is wrong with all psychology textbooks (including those I have written) is their overlong chapters. Few can read a 40-page chapter in a single sitting without their eyes glazing and their mind wandering. So why not organize the discipline into digestible chunks-say forty 15-page chapters rather than

fifteen 40-page chapters-that a student could read in a sitting, with a sense of completion? Thus, when McGraw-Hill psychology editor Chris Rogers first suggested that I abbreviate and restructure my 15-chapter, 600-page Social Psychology into a series of crisply written 10-page modules, I said "Eureka!" At last a publisher willing to break convention by packaging the material in a form ideally suited to students' attention spans. By presenting concepts and findings in smaller bites, we also hoped not to overload students' capacities to absorb new information. And, by keeping Exploring Social Psychology slim, we sought to enable instructors to supplement it with other

Does empathy felt while reading fiction actually cultivate a sense of connection, leading to altruistic actions on behalf of real

others? Empathy and the Novel presents a comprehensive account of the relationships among novel reading, empathy, and altruism. Drawing on psychology, narrative theory, neuroscience, literary history, philosophy, and recent scholarship in discourse processing, Keen brings together resources and challenges for the literary study of empathy and the psychological study of fiction reading. Empathy robustly enters into affective responses to fiction, yet its role in shaping the behavior of emotional readers has been debated for three centuries. Keen surveys these debates and illustrates the techniques that invite empathetic response. She argues that the perception of fictiveness increases the likelihood of readers' empathy in part by releasing them from the guarded responses necessitated by the demands of real others. Narrative empathy is a strategy and subject of contemporary novelists from around the world, writers who tacitly endorse the potential universality of human emotions when they call upon their readers' empathy. If narrative empathy is to be taken seriously, Keen suggests, then women's reading and responses to popular fiction occupy a central position in literary inquiry, and cognitive literary studies should extend its range beyond canonical novels. In short, Keen's study extends the playing field for literature practitioners, causing it to resemble more closely that wide open landscape inhabited by readers.
