Revised and fully updated, this textbook provides a detailed yet accessible introduction to the key aspects of ecosystem services. Ecosystem services is one of the most powerful guiding principles for ecology, biodiversity conservation and the management of natural resources. It provides the basis of assessing the multiple values and services that ecosystems can provide to humankind, including diverse issues such as carbon sequestration, flood control, crop pollination and aesthetic and cultural services. The second edition of *Ecosystem Services: Key Issues* has been fully revised and updated to address policy and scientific developments, as well as new and emerging issues, such as nature-based solutions, zoonotic diseases and environmental justice. It includes new and updated case studies from across the world and each chapter contains further reading, learning objectives and discussion questions to aid student learning. The book details the historical roots of ecosystem services in the second half of the twentieth century, through initiatives such as the Millennium Ecosystem Assessment, The Common International Classification of Ecosystem Services (CICES) and the United Nations Sustainable Development Goals. It shows how ecosystem goods and services can be categorised and valued in economic as well as non-monetary terms, while also highlighting some of the difficulties and limitations of valuation techniques. The author describes how themes such as systems thinking, social-ecological resilience and natural capital relate to ecosystem services, and how these can contribute to more sustainable and equitable development. This book will be essential reading for students and scholars of ecosystem services, ecology, environmental science, biodiversity conservation, environmental economics, natural resource management and sustainable development. It will also be of use to professionals and policymakers who are looking to integrate ecosystems and their services into their decision making processes.

This book is the first comprehensive international overview of maternity services. Drawing on concepts of risk and social citizenship, it explores the relationship between welfare regimes and health policy by comparing and contrasting provision for childbearing women. Each substantive chapter focuses on a different country, presenting detailed contextual information on health care provision, maternity interventions and birth outcomes there. They discuss key issues such as birth rates and fertility patterns, the role of patient choice, attitudes to place of birth and maternity entitlements among others, and the countries covered represent diverse welfare regimes, including Ireland, Scotland, Sweden, the Netherlands, Germany, Italy, Japan, the United States, Canada, Australia and New Zealand. An extended introduction and a conclusion draw the book together and place it in the context of the literature on comparative welfare regimes. It is an important reference for students and academics interested in comparative social policy, health services research, and maternity services and policies.

Authoritative and readable, this book is the first historical overview of US federal tax systems published since 1967. Its coverage extends from the ratification of the Constitution to the present day. Brownlee describes the five principal stages of federal taxation in relation to the crises that led to their adoption - the formation of the republic, the Civil War, World War I, the Great Depression, and World War II - and discusses the significant modification during the Reagan presidency of the last stage. Brownlee also addresses the proposals made since the fall of 1994 congressional elections under the 'Contract with America' and competing schemes, and he assesses today's conditions for a tax revolution in the light of the national emergencies that have produced revolutions in the past. While focusing on federal policy, Brownlee also attends to the related history of state and local taxation.
