Category Five is a new supernatural YA thriller from Ann D á vila Cardinal, set against the backdrop of a post-hurricane Puerto Rico. After the hurricane, some see destruction and some smell blood. The tiny island of Vieques, located just off the northeastern coast of the main island of Puerto Rico, is trying to recover after hurricane Maria, but the already battered island is now half empty. To make matters worse, as on the main island, developers have come in to buy up the land at a fraction of its worth, taking advantage of the island when it is down. Lupe, Javier, and Marisol are back to investigate a series of murders that follow in the wake of a hurricane and in the shadow of a new supernatural threat. Excerpt from China Coast Tales Foochow was convulsed, was rent in pieces, by a new excitement. The port was going to sleep commercially, that was certain; but it was always astir socially. True, it was so far away both from Shanghai and from Hong Kong, that it was oat of the wash, so to speak, of their social revolutions. But this very distance from the great Eastern centres of fashionable typhoons had given Foochow, in commotions, an individuality of its own. Foochow had its own particular favourites, leaders of fashion, etiquette, and laws of precedence. In short, it had everything that renders a port formidable to a new-comer and delightful to an old resident. For Foochow had its old residents, the list of whom was headed by the British Consul and his wife, who had adorned the port for the last fifteen years. On the other hand, among the shifting population, i.e. amongst those who made no permanent mark on Foochow society, would have to be reckoned the entire Customs' staff. The Commissioners at any rate had been mostly antiquated, out-of-date men, who looked upon this place as their last post in China, and occupied themselves solely with piling dollars against their coming retirement. The assistants had been either rabid sinologues or affable bachelors. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as... THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

'If you were looking to fly from Dickens to Martin Amis with just one overnight stop, then Hamilton is your man' Nick Hornby 'I recommend Hamilton at every opportunity, because he was such a wonderful writer and yet is rather under-read today. All his novels are terrific' Sarah Waters Patrick Hamilton's novels were the inspiration for Matthew Bourne's new dance theatre production, The Midnight Bell. 'Beyond the fact that it was, in face of a vivid and calamitous ending, to reveal from his own experience the ardent splendours of Youth's adventure, he didn't quite know what his novel was going to be about.' Monday Morning wryly tells the story of Anthony, a young man taking his passionate first steps in life, in London, and in love. Not yet worn

down by the world, Anthony is determined to write the novel that will bring him fame and fortune - and to marry the beautiful Diane. Patrick Hamilton's witty, playful first novel introduces us to the grimy world of metropolitan boarding houses and provincial theatrical digs that would be the setting for his later masterpieces *Hangover Square* and *The Slaves of Solitude*, and the hopes, dreams and regrets those who live there.

The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually, collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the 'war to end all wars'.

Real life isn't a fairy tale as the grieving, angry young oyster better known as Lil Momma and her sad human companion, Little Missy have both discovered. Through a twist of fate their paths cross. Despite species and culture they have more in common than the similarities of their names. Both have suffered great losses and battered self esteems making them feel more forgotten than a discarded pebble. Their seemingly uncontrollable life has them plunged into undercurrents that drag them topsy turvy to the rocky ocean floor! They have lost vital parts of their lives to "The Sea" and the "Big C". They fight to survive emotional boisterous hurricanes that rage so recklessly it pummels like a Bahamian Category 5 storm!. It takes strength of heart to endure loss and pain while rebuilding oneself and dealing with the sometimes turbulent circle of life. And as these two journey towards healing and truth, their salvation is unearthed and harvested by unselfishly gifting themselves to others while embracing and loving the gems within.

Whether in football or in the law, Illinois Supreme Court Justice Robert Thomas has always had the "best view from the bench." Bob Thomas got his start in football at the University of Notre Dame, kicking for the famed "Fighting Irish" in the early 1970s. Claimed off waivers by the Chicago Bears in 1975, Thomas helped to take the franchise from their darkest days to their brightest. Yet, on the cusp of the team's greatest moment, he was struck with a shocking blow that challenged his fortitude. In this dramatic retelling of Bob Thomas's fascinating life, renowned sports writer Doug Feldmann shows how neither football nor the law was part of Thomas's dreams while growing up the son of Italian immigrants in Rochester, New York, in the 1960s. Chasing excellence on both the gridiron and in the courtroom, however, would require resilience in ways he could not

have imagined. As *A View from Two Benches* shows us, Bob Thomas reached the top of two separate and distinct professions, guided by a bedrock of faith that has impacted his decisions and actions as both a football player and a judge, helping him navigate the peaks and valleys of life. As Doug Feldmann reveals, Bob Thomas has always stayed true to the values he learned in his earliest days. Doug Feldmann's rich biography of an accomplished kicker and a proud justice of the law shows us that determination and resilience go a long way to a successful and impactful life.

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. *Hydrogen Fuel Cells for Road Vehicles* also examines the concerns faced during the design and realization of a PEM fuel cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. *Hydrogen Fuel Cells for Road Vehicles* is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.

Diamonds are a multi-billion dollar business involving some of the world's largest mining companies, a million and a half artisanal diggers, more than a million cutters and polishers and a huge retail jewellery sector. But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and weapons-trafficking. *Diamonds* brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations. This part of the diamond story has rarely been told.
