Structures and ...
The model uses

principles of mathematical epidemiology to model the dynamics of the two political parties. In general, most dynamical social phenomenon may be modelled by using these epidemiological type differential equations, see for instance Petersen (1991), Alvarez and Nagler (2000), Burden (2004), Huckfeldt and Kohfeld (1992), Belenky and King (2007).

Signs of possible 'end of a two-party system':

Republican governor The purpose of this chapter is to examine the dynamics of an idealized two party democracy. In this setting, we will investigate the behavior of two political parties who must compete for support from a common population. This is the first case where the dynamics of democracy are analyzed mathematically.

...

Abstract. This book examines the role played by the parties themselves in two-party systems. It rejects the argument that the behaviour of the parties is determined largely by social forces or by the supposed logic of the electoral market. Instead, it shows that both structure and agency can matter. It focuses on three major aspects of change in two-party systems: why occasionally major parties collapse; why collapsed parties sometimes survive as minor parties, and sometimes do not; and what ...
